North American HVAC

## Outdoor Wall Mounting Bracket (For 9,000-36,000 BTU)

- Adjustable to fit 9,000 BTU – 36,000 BTU units with a maximum weight capacity of 300 lbs.
- Powder-coated hardened steel. Hardware included for attaching the condenser and expansion bolts to the wall mounting.
- Built-in vibration control and shock absorbers. Adjustable backstop.
- Ideal solution for mounting mini split condensers above ground on multi-level buildings
- Provides more protection from ground-level debris, heavy rains, floods, vandalism, etc. than ground pads

**SKU:** OWMB09-30K **Category:** Miscellaneous

## Equipment Stand – Heavy Duty

This ground stand is designed to work with most mini split air conditioner systems, it can support over 330lbs of weight and can easily be placed outside your home or business.

- A perfect addition to any ductless split air conditioner purchase.
- Supports up to 250kg (550 lbs).
- Weatherproof design for long-lasting support.

**Category:** Miscellaneous
